

24-hour Urine Sample Collection Instructions

Follow these instructions carefully.

General instructions:

1. Do not drink any alcohol during the 24 hours you are collecting the specimen.
2. The collection jug sent home with you may contain a liquid preservative. Do not empty the liquid from the jug.
3. Keep the jug with the urine that is collected in the refrigerator.
4. If you have any questions or concerns, call (800) 932-8758 or (701) 323-5489.

To start the collection:

1. Empty your bladder. Do not save this urine.
2. Write the date and time on the jug label.
3. From then on, save **all** of your urine in the jug provided, day and night.

To finish the collection:

1. Exactly 24 hours after the date and time you started the collection, empty your bladder and add this urine to the jug.
Example: If the urine collection was started at 9 a.m., the final urine would be collected and added to the jug at 9 a.m. the following day.
2. Write the date and time on the jug label.
3. Bring the jug to the laboratory as soon as you can after the 24-hour collection is done.

- A blood sample will need to be drawn when you bring in your urine collection.
- A blood sample is not needed when you bring in your urine collection.
